LIST OF CONTENTS

NUMBER 1

i Softstrip® data strip containing the contents of this issue of *Computers & Electrical Engineering*

1 Editorial

Xiao Luo and **Paul Gillard** 3 A VLSI design for an efficient multiprocessor cache memory

Young C. Park and **Gregory P. Starr** 23 Efficient fingertip force computation for object manipulation using dexterous robot hand

Raju Ramaswamy 35 A scheme for providing security services in ISO–OSI computer network architecture

P. Yip and **Fangming Wang** 43 A prime-factor decomposed algorithm for the discrete sine transform

S. K. Sinha and **T. Nagaraja** 51 Extended Kalman filter algorithm for continuous system parameter identification

I Software Survey Section

NUMBER 2

i Softstrip® data strip containing the contents of this issue of *Computers & Electrical Engineering*

Ren Liang, M. Shridhar and **M. Ahmadi** 65 Texture in images: algorithms for comparison and segmentation

S. K. Nagar, Jayanta Pal and **J. D. Sharma** 79 A computer-aided method for digital controller design via optimization

D. P. Mital and **W. L. Goh** 87 A microprocessor-based intelligent multifunction instrument

Hassan A. Kalhor 95 Computer aided analysis of characteristic impedance of rectangular coaxial lines

M. Aldeen and **M. Jamshidi** 99 Decentralized control of large-scale dynamical systems incorporating feedforward compensators

Technical Note
Mustahsan Mir and **M. Hasan Imam** 109 A gradient-based method for module placement

I Software Survey Section

NUMBER 3

Niraj K. Jha and Qiao Tong 115 Detection of multiple input bridging and stuck-on faults in CMOS logic circuits using current monitoring

Yoheved Dotan and Benjamin Arazi 125 Design verification of digital systems based on logic programming

Xu BaiQiang and Nathan Ida 139 A dynamically segmented bus architecture

A. K. Sinha and Jayanta Pal 159 Simulation based reduced order modelling using a clustering technique

Technical Note

Paul D. Stigall and Chung-Ho Chen 171 A performance simulation of local area networks using CSMA/CD and token bus protocols

I Software Survey Section

NUMBER 4

Malur K. Sundareshan and Raju Ramaswamy 177 Integrated data ciphering unit design for secure message transfer in networks

Wayne Wolf 193 Recoding-derived bounds for input encoding

Hassan A. Kalhor 203 Quasi-static analysis of a.c. resistance of rectangular conductors

M. Aldeen and J. F. Marsh 207 Observability, controllability and decentralized control of interconnected power systems

Technical Note

S. Bingulac and A. Saberi 221 A CAD package for solving the squaring down problem

I Software Survey Section
